PROJECTS

ONLINE FASHION BOUTIQUE, Professional website

Project Link

- Worked on **ONLINE FASHION BOUTIQUE** using **HTML5**, **CSS3**, **BOOTSTRAP**, **JAVASCRIPT**, **JQUERY**, **MYSQL**, **PHP**
- Developed website and UI designs using HTML/CSS from front-end to back-end. Performed validations using JavaScript.
- Aim: To make **placing orders easier** for existing customers and allow business **to find new audiences**.

AtoZ Store

Project Link

- Worked on **AtoZ Store** using **HTML5**, **CSS3**, **BOOTSTRAP**, **Angular**, **NodeJS**, **Express.JS, MONGODB** and some **API's**.
- A new and fastest way to **shop** whatever you want anywhere and anytime.
- I created a platform using Angular at frontend and NodeJS as backend. Two modules are provided named **User** and **Admin**. User can register, login, purchase and show orders while admin can add categories, subcategories, products, create new admins etc. Everything is **fast** and **encrypted**.

eduSpace (Major Project)

Project Link

- Worked on **eduSpace** using **HTML5, CSS3, BOOTSTRAP, PHP, MYSQL, JAVASCRIPT etc.**
- I created a full featured platform to combine **time-tracking**, **communication**, **collaboration**, **planner** and **analysing tools** all in one place so students and professors do not need to spend extra time or money for other platforms.
